

# JOB Offer

## Geo-Webdevelopment

### Graphical web programming and development

In the University of Vienna, Faculty of Geosciences, Geography and Astronomy, Department of Geography and Regional Research (Cartography and Geo-Information), the position of a project assistant can be filled as soon as possible.

#### Tasks:

- Design and programming of web APIs for geodata in PHP.
- Programming of web applications with map embedding in Javascript.
- Design of database schemas in PostgreSQL and MySQL/MariaDB.
- Programming scripts in PHP for automated data processing on the Linux command line.

#### Requirements profile:

- Experience with designing and implementing web applications (ideally in PHP and JavaScript).
- Experience with Linux (ideally Debian or related distributions).
- Ideally knowledge of common geodata formats and first experience with Leaflet.
- Ideally knowledge of Linux and Unix environments.
